Kelly Kindscher presents

Prairie Ethnobotany The Native Medicinal Plant Research Program

3:30 pm, Friday, April 10

Peggy V. Helmerich Browsing Room
Edmon Low Library-OSU Stillwater

About the Speaker:

Kindscher is a passionate advocate for native plants and their uses, native landscapes and wild places. He works at the University of Kansas at the Kansas Biological Survey and in the Environmental Studies Program. He is the author of two books: "Edible Wild Plants of the Prairie" and "Medicinal Wild Plants of the Prairie" and has published over 100 scholarly articles and technical reports. Currently he is focusing much of his attention on collecting medicinal plants and searching for ethnobotanical data that help support the use of native plants for the KU Native Medicine Plant Research Program.

**Presented by the OSU Library
and Department of Botany**
